New Partnership with industry leading Recruiter

We are delighted to announce that PlastikCity will be working in partnership with Listgrove to give our customers direct access to this leading niche recruitment provider to the Plastics/Polymer industry.

Established in 1975, Listgrove is a privately owned recruitment business with a specific focus towards the Plastics, Polymer and associated sectors. They offer Retained Assignments, Contingency Recruitment, Interim Management, Advertising Response Campaigns, Outplacement and HR Services, Management Assessment and Development and Psychometric Testing.

Listgrove supports projects across the globe and across a range of functions and levels of seniority. Customers engage Listgrove where they have particularly demanding needs and especially where traditional recruitment methods are unlikely to be able to provide the desired selection of candidates.

Like many manufacturing companies, Listgrove keeps their operations lean, which also enables a more 'personal' approach to customers, allowing relationships to flourish. They employ 14 people who operate from our head office in Stratford-upon-Avon managing recruitment and HR projects across Europe, the Americas, Middle East and Asia. They also have global meeting / interview facilities including London, Bahrain and other regional centres across the UK.

They have close associations with several plastic industry bodies and promote their business at many global exhibitions. This visibility, alongside our network and long standing brand, ensure they gain access to 'best in class' candidates.

Listgrove was established in 1975 primarily to supply expatriates from the UK to overseas companies where there were technical skill shortages. This continued into the early 1980's until the expatriate market presented less opportunities for growth.

Following a strategic review in 1984, it was decided to specialise in plastics rather than acting as a generalist, as this was seen as a growth sector. Since this time, their specialism has grown to include: Packaging, Chemicals, Rubber, Medical Device, Composites, Adhesives, Coatings and other related Technical sectors. As a result their candidate reach extends across many industries including: Automotive, FMCG, Medical, Electrical and Pharmaceutical.

Listgrove are conscious of both service cost and value at a time of difficult marketplace trading conditions. Access to Listgrove can be made directly though the PlastikCity website and selected Industry Jobs from the main menu.

Please contact Airelle Charra – Marketing Manager for more information on 01789 207070 or airelle.charra@listgrove.co.uk – visit their website at www.listgrove.com
